+ Personal Summary

“

I work predominantly in front-end design, development and integration. My career started in 2008 and since then I have gained extensive experience of web design and development in an academic, commercial and not for profit environment.

With a rounded knowledge of Web technologies and creative skills it enables me to work closely with designers to bring designs and interactive elements to life from wireframes, prototyping to site build. I frequently work on designs with complex interactions and integration.

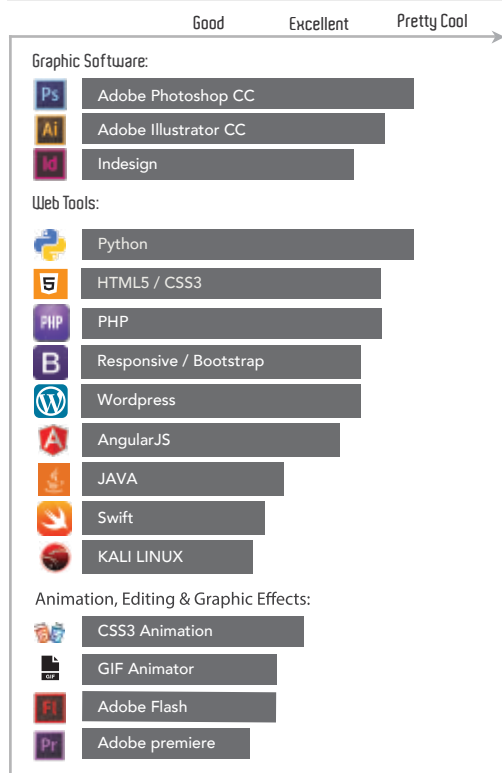

I have key skills in usability, accessibility, cross platform browser issues, advanced CSS based design, responsive design, mobile sites and user interface design using a range of web technologies. I work equally well alone and as part of a global multi-functional team. I have good practical, communication and organisational skills, been a mentor and team leader.

I'm currently employed by Leader healthcare as a front end Web Developer developing and maintaining their global marketing sites promoting the brand and products.

In my spare time I enjoy photography, working on personal development projects, playing guitar, as well as spending time with my young family.

”

+ Technical skills

+ Experience

- Leader Healthcare FZCO** December 2015 – Present
 - UAE, Dubai
